EDUCATION

Don Bosco Institute of Technology, Mumbai University 2021 – 2025
Bachelor of Engineering in Information Technology CGPA: 8.67 / 10

- **Coursework:** Data Structures & Algorithms, Object-Oriented Design, System Design, DBMS, Operating Systems

SKILLS & CERTIFICATIONS

Languages & Backend Architecture: Java (17+), Go, Node.js, Nest.js, Python, TypeScript, REST APIs, Microservices, Object-Oriented Programming (OOP), Design Patterns
Frontend & Web Engineering: JavaScript, React.js, Next.js, Angular.js, HTML5/CSS3, Tailwind CSS, Webhooks, State Management
Databases & Platform Scale: PostgreSQL, MySQL, Redis, AWS, Docker, Kafka, OpenTelemetry, System Design, Distributed Systems
Developer Tools & Methodologies: Git, Linux/Shell, Unit Testing (Jest/JUnit), Postman, Agile/Scrum, Test-Driven Development (TDD), CI/CD
Certifications: Meta Front-End Developer | IBM Product Management | Google UI/UX Certificate

EXPERIENCE

FlexiLoans Jun. 2025 – Present
Software Engineer - I | Full Stack Mumbai, MH
Full Stack Stack: *Java, TypeScript, Node.js, Nest.js, Angular.js, React.js, Next.js, Redis, Python, MySQL, PostgreSQL, AWS, Docker*

- **Customer Onboarding Platform:** Architected high-throughput REST API services and asynchronous webhooks orchestrating end-to-end customer onboarding, credit bureau scoring, identity/KYC verification, e-signatures, and loan disbursal engines **slashing TAT by 60%** and **boosting completion by 42%**.
- **In-House Financial Document Parser:** Engineered an OO-based, high-throughput statement parsing engine from scratch using custom regex tokenizers and async worker threads. Replaced expensive vendor dependencies, matching **99% parsing accuracy** while **eliminating annual vendor overhead**.
- **AI Agent Workbench & Flexi-MCP Architecture:** Designed an extensible full-stack agent framework and high-concurrency Model Context Protocol (**Flexi-MCP**) server in Python/Node.js, safely bridging generative LLMs with core backend APIs **cutting manual operational tasks by 45%**.
- **Flexy - Multilingual Conversational Voice AI Agent:** Built low-latency, real-time voice Agent for customer onboarding with dynamic intent classification guardrails, **reducing application TAT to under 5 minutes** and **driving 40% higher lead conversion**.
- **Real-Time Credit Score Ingestion Engine:** Designed scalable, event-driven backend services for instant credit profile retrieval. Implemented multi-tiered Redis caching and exponential backoff retries, **handling 50K+ daily checks** with sub-second latency and **boosting qualified lead acquisition by 48%**.

PROJECTS

VANA – AI-Powered Conversational Mental Health Platform
Go, React, PostgreSQL, Groq, Gemini 2.5 Flash, Docker, Supabase

- **Dual-LLM Orchestration:** Architected dual-LLM orchestration giving clinical insights at sub-second latency, driving a **35% increase** in user engagement and mental relief.
- **Multilingual Voice Pipeline:** Built a multilingual voice pipeline with an AI Refiner for English, Hindi, and Marathi, scaling accessibility to **90% of the regional demographic** via high-fidelity transcription.
- **Crisis Safety Guardrails:** Integrated context-aware safety guardrails and adaptive soundscapes for real-time crisis detection, resulting in **0% false-negative handoffs** to clinical resources.

TRANSCRIBO – An Offline STT Transcription Meeting Application
Django, SQL, ReactJS, REST API, OpenAI Whisper, PyAnnote

- **Real-Time Diarization Engine:** Built an offline Speech-to-Text web platform utilizing deep learning transcription models, achieving **84% accuracy** for multi-speaker diarization and identification.
- **Automated Summarization Data Pipeline:** Designed automated data transformation pipelines and background tasks to process audio logs, extract key action items, and trigger automated email summaries.

LEADERSHIP

Google Developer Student Club (GDSC) – *Head of Events* Aug. 2023 – July 2024
Training and Placement Cell – *Co-ordinator & UI/UX Head* Jan. 2023 – Present

ACHIEVEMENTS

- Achieved **AIR 241** out of 100,000+ engineers at **Codekaze 24'** by Coding Ninjas (DSA, Algorithms & System Design).
- Won **First Prize** at **InnoQuest 23'**, a national-level technical project competition.
- Solved **400+ DSA problems** focusing on Data Structures, Object-Oriented Design, and Algorithms across LeetCode and GeeksforGeeks.
